*Fabrics indicated with an asterisk have passed NFPA 701 testing for flame retardancy.

The maximum sizes that the hardware systems can accommodate are 96" x 96" for a Spring Roller and 168" x 168" for Clutch Rollers, but are also subject to the size limitations of the fabrics as listed in columns 1 - 3.

¹ **Maximum Size: Normal** - This is the largest size available without seaming or railroading.

² **Maximum Size: Railroaded** - This is the largest size available by turning the material sideways (railroading) without a seam. "n/a" means the material cannot be railroaded.

³ **Maximum Size: Seamed** - This is the largest size available by turning the material sideways (railroading) with a visible horizontal seam.

⁴ **Railroad Warning:** Patterns with "Yes" under "Railroaded Warning" can be railroaded, but the pattern will have a noticeably different orientation than a non-railroaded shade. For example, horizontal lines or patterns will run vertically.
Mixing railroaded and non-railroaded shades in the same room is not recommended.
