

FlexStyle® Cassette

Designed for simple beauty and easy installation.

Now available to order!

Transform your space with the sleek, contemporary look of FlexStyle® Cassette window shades. Designed for ease of installation and style, these shades ship fully assembled for an uncomplicated install while offering the perfect finishing touch to any room. Choose FlexStyle® Cassette for a strong, durable build that provides an elegant, luxury aesthetic.

Stylish Design

Constructed of aluminum, FlexStyle® Cassette is available in two modern profile shapes: square and curved. Whether you prefer clean, square design or a gentle curve, these shades add a touch of sophistication to any space with no visible fasteners.

Square Cassette

Curved Cassette

Choose between an open bottom or a bottom return. With an open bottom, the cassette can be fabric wrapped. The optional bottom return design conceals the shade roller and interior hardware for a clean, finished look, and cannot be fabric wrapped.

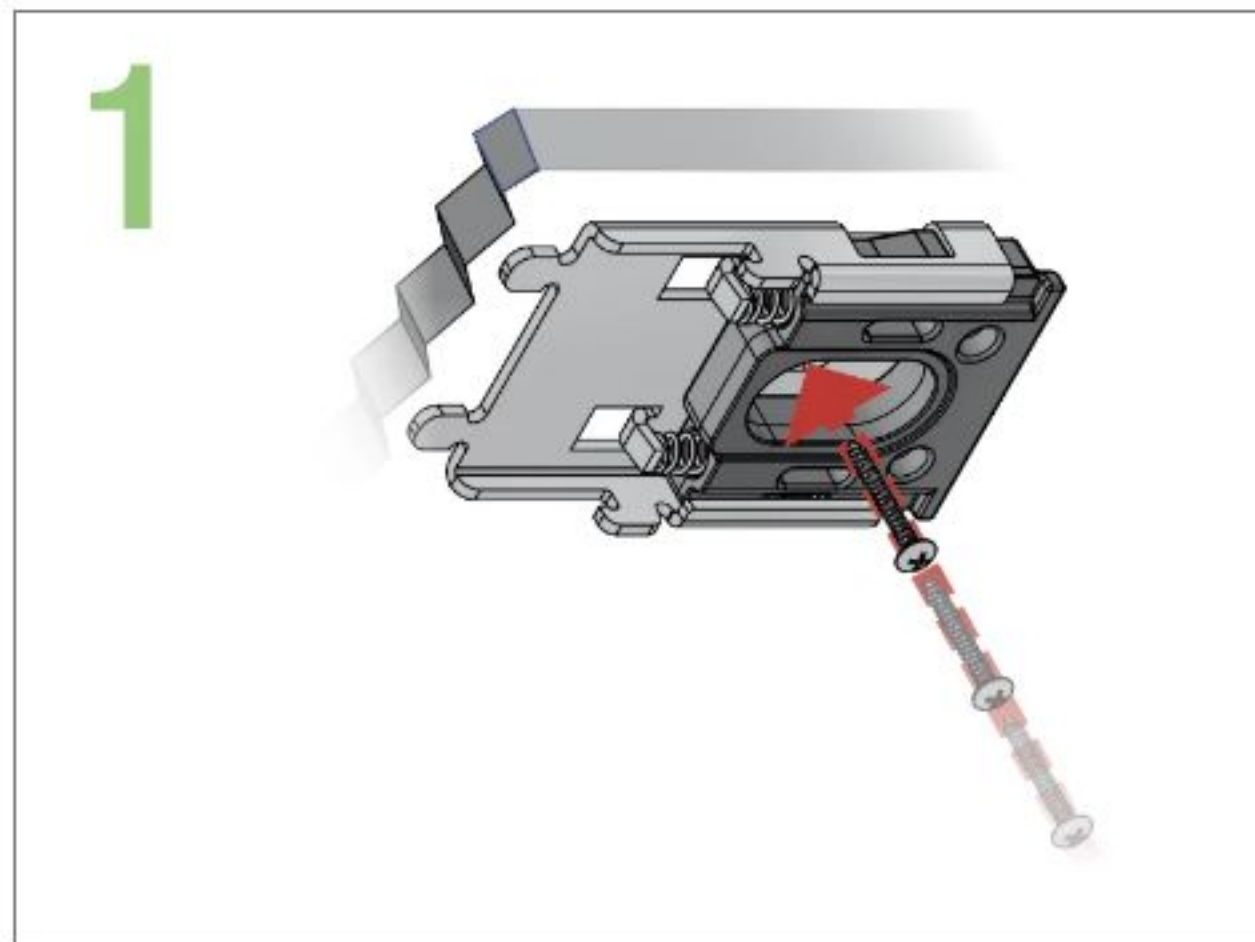

Hardware Finishes

Select a fabric wrapped cassette for hardware that blends perfectly with your chosen shade material. Optionally choose a solid color cassette, available in a textured Antique Bronze finish, or matte colors in Black, White, Taupe, Warm White, and Grey. Whether you choose fabric wrapped or a solid color cassette, the bold aluminum endcaps are painted the same color as the rest of the cassette.

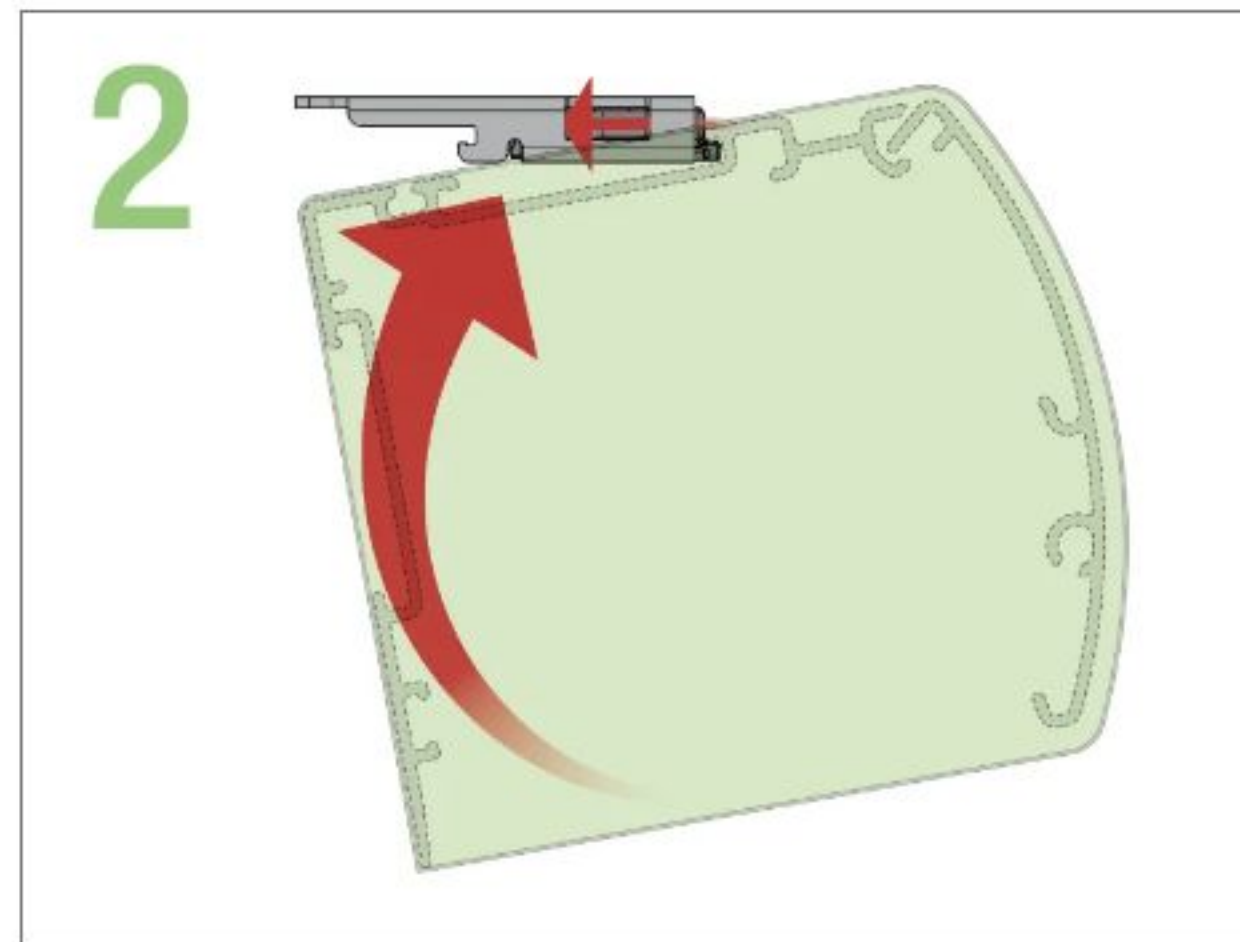

Mounting: Easy as 1, 2, 3.

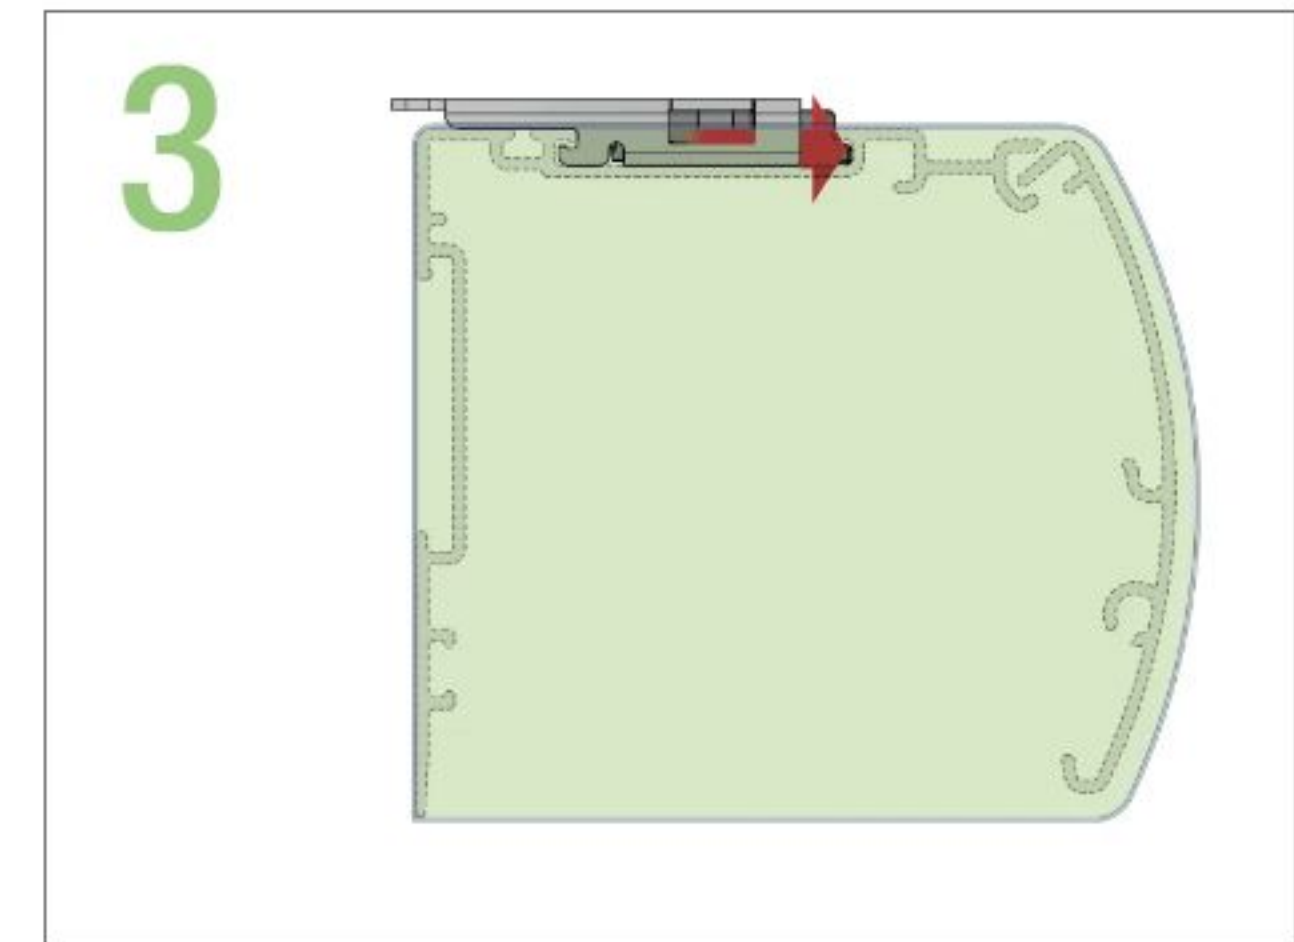

Say goodbye to complicated installations. FlexStyle® Cassette makes it easy with sizes up to 65" wide requiring only two mounting brackets (larger sizes require three) on either ceilings or walls. Each spring-loaded bracket installs with only a single screw. This means that mounting most FlexStyle Cassette shades can be completed by installing two brackets, and then lifting the cassette into place. One installer can get most FlexStyle® Cassette shades up and running quickly, saving time and effort.

Install spring-loaded brackets with one screw each.

Insert bracket tabs into channel on the cassette, press in to compress the springs, and rotate cassette into position.

Release spring tension to secure.

FlexStyle® Flair, Cassette Convenience.

Whether you prefer the open roll design of FlexStyle® or the fully enclosed, easy-install FlexStyle® Cassette, both bring their own designer touch to your space.

FlexStyle® Cassette is available in both square and curved designs, with the option for a fabric-wrapped case or a selection of stylish hardware finishes.
